Summer of Nix 2022 Report

The Summer of Nix 2023 organization team

1 Summary

This is a short report about Summer of Nix 2022. To understand the program and its history, we recommend reading the detailed 2021 Report¹. 2021 was the first year in which Summer of Nix was held. Despite its overall success, it became clear that organizing a group of 30+ developers for three months is a challenge. The program for the 2022 edition was refined and new forms of organization were experimented with, as described in the announcement².

A prominent addition was the introduction of mentoring by maintainers of participating projects, such as Jitsi's Nix packaging, Nix documentation and dream2nix. Also new were regular facilitated mob programming sessions. Participants could also choose to work freely on packages in our main backlog of NGI projects, similar to 2021. Another change to the program was that the attached Nix lecture series was made public.

The number and quality of contributions compared to the amount of resources invested in the program was satisfactory and there was enthusiasm from the participants. The public lecture series got a lot of traction beyond Summer of Nix and was a success.

However, with low budget and limited time, coordinating and mentoring of so many developers – many of them junior – remained a challenge. This left many with the feeling that we could achieve more in the given time. For example, the packaging of many projects reached almost-completion, which is less than was intended. Having three different organization forms: free packaging, project-specific mentoring, and mob programming, was confusing to participants. The latter two forms, being more structured, were more pleasant for participants and more effective.

Overall, it remains our belief that the concept of Summer of Nix, a sponsored program where participants collaborate on Nix packaging of open-source software, is sound. On the other hand, we intend to refine its implementation. Work on upcoming solutions/improvments to the challenges mentioned above is ongoing in the planning of Summer of Nix 2023.

2 Participation stats

- Total number of applicants: 156
- Total accepted candidates by role:
 - 21 participants
 - 6 tech-wiz's
 - 6 project leads
 - 5 team coordinators
 - 2 tech-wiz's on a waiting list
 - 16 participants on a waiting list
 - 99 declined applications
- Diversity:
 - 1 woman out of 38 accepted participants
 - 5 participants from Central Asia,
 - 3 from East Asia,
 - 18 from Europe,
 - 2 from Middle East,
 - 10 from North America
- Actual participants:
 - 4 accepted participants and 1 team coordinator did not participate
 - 5 participants gave up their stipend for various reasons

3 Budget

- Stipends paid: 65649 EUR
- Cost of material (mostly cloud servers): 340 EUR
- Grand total of costs: 65 989 EUR

4 Summer of Nix 2022 contributions

- https://github.com/nix-community/dream2nix/pull/321
- https://github.com/nix-community/dream2nix/pull/323

4.3.2 microvm.nix

- https://github.com/NixOS/nixpkgs/pull/187177
- https://github.com/NixOS/nixpkgs/pull/186473
- https://github.com/NixOS/nixpkgs/pull/185981
- https://github.com/NixOS/nixpkgs/pull/186328
- crosvm tap network interface support
- PCI/USB device passthrough
- Enhanced documentation
 - https://astro.github.io/microvm.nix/conventions.html
- Can now optionally use hypervisors from the host's nixpkgs for security
- Support for **erofs** bootDisks
- Serial console support
- A reusable Flake to run NixOS MicroVMs on Hyperconverged Infrastructure using NixOS/GlusterFS/Nomad: Skyflake https://github.com/astro/skyflake

4.4 NGI Packages

4.4.1 castopod-host

- https://github.com/ngi-nix/castopod-host/pull/1
- https://github.com/ngi-nix/castopod-host/pull/2

4.4.2 katzenpost

• https://github.com/ngi-nix/katzenpost/pull/2

4.4.3 node-Tor

• https://github.com/ngi-nix/node-Tor/pull/1

4.4.4 scion-path-discovery

• https://github.com/ngi-nix/scion-path-discovery/pull/2

4.4.5 Lemmy:

- https://github.com/NixOS/nixpkgs/pull/182251
- https://github.com/NixOS/nixpkgs/pull/182371
- https://github.com/NixOS/nixpkgs/pull/182441
- https://github.com/NixOS/nixpkgs/pull/183613
- https://github.com/jhass/nodeinfo/pull/58

4.4.6 vg:

• https://github.com/ngi-nix/magic rb-vg/pull/1

4.4.7 hyperspace:

https://github.com/ngi-nix/hyperspace

4.4.8 kaitaistruct, kaitai-struct-compiler

• https://github.com/NixOS/nixpkgs/pull/182154

4.4.9 ngx-http-auth-sasl-module

https://github.com/stef/ngx http auth sasl module/pull/2

4.4.10 ARPA 2

• https://github.com/NixOS/nixpkgs/pull/184588

4.4.11 Dino

- https://github.com/NixOS/nixpkgs/pull/181929
- https://github.com/NixOS/nixpkgs/pull/185173

4.4.12 Ocaml-dns, cmdliner updates

https://github.com/NixOS/nixpkgs/pull/184394

4.4.13 BANG

https://github.com/armijnhemel/binaryanalysis-ng/pull/330

4.4.14 proximity_matcher_webservice (for BANG)

- https://github.com/armijnhemel/proximity matcher webservice/pull/2
- https://github.com/armijnhemel/proximity_matcher_webservice/pull/3

4.4.15 univers (for BANG)

- https://github.com/nexB/univers/pull/77
- https://github.com/nexB/univers/pull/78

4.4.16 flare-floss (for BANG)

• https://github.com/NixOS/nixpkgs/pull/182814

4.4.17 Nitrokey

- https://github.com/NixOS/nixpkgs/pull/183099
- https://github.com/ngi-nix/nitrokey-firmware/pull/1

4.4.18 ChipWhisperer:

- https://github.com/newaetech/chipwhisperer/pull/415
- https://github.com/ngi-nix/chipwhisperer/pull/3

4.4.19 ocaml-fsq

- https://github.com/p2pcollab/ocaml-fsq/pull/3
- https://github.com/ngi-nix/p2pcollab-ocaml-fsq

4.4.20 sbws

• https://github.com/ngi-nix/sbws-flake/pull/1

4.4.21 Fractal

• https://github.com/ngi-nix/fractal

4.4.22 Sylk Server

- https://github.com/NixOS/nixpkgs/pull/188018
- https://github.com/NixOS/nixpkgs/pull/188021
- https://github.com/NixOS/nixpkgs/pull/188015
- https://github.com/NixOS/nixpkgs/pull/187995

4.4.23 ocaml-psi

• https://github.com/ngi-nix/p2pcollab-ocaml-psi

4.4.24 Cryptolyzer

- https://github.com/ngi-nix/cryptolyzer
- https://github.com/NixOS/nixpkgs/pull/185456

4.4.25 Sipexer

• https://github.com/NixOS/nixpkgs/pull/185278

4.4.26 StreetComplete

• https://github.com/ngi-nix/StreetComplete

4.4.27 JShelter

• https://github.com/ngi-nix/jshelter

4.4.28 LiberaForms

- https://github.com/ngi-nix/liberaforms-flake
- https://gitlab.com/liberaforms/liberaforms/-/merge_requests/320

4.4.29 Goblins

• https://github.com/NixOS/nixpkgs/pull/188250

4.4.30 GNU SASL

• https://github.com/NixOS/nixpkgs/pull/186893

4.4.31 Blink

• https://github.com/ngi-nix/blink/pull/1

4.4.32 opaque-sphinx

• https://github.com/ngi-nix/opaque-sphinx/pull/4

4.4.33 EgilSCIM

• https://github.com/ngi-nix/EgilSCIM/commit/74781d

4.4.34 Bloomf

https://github.com/p2pcollab/bloomf/pull/2

4.4.35 plotkicadsch

• https://github.com/NixOS/nixpkgs/pull/189045

4.4.36 riscv-phone

- https://github.com/ngi-nix/riscv-phone
- https://github.com/ngi-nix/riscv-phone/pull/8

4.4.37 EteSync

• https://github.com/ngi-nix/etesync-ios

4.4.38 re-Isearch

• https://github.com/NixOS/nixpkgs/pull/182120

4.4.39 GNU Taler

• https://github.com/NixOS/nixpkgs/pull/182139

4.4.40 SCION

https://github.com/ngi-nix/scion/pull/5

4.4.41 redwax

• https://github.com/NixOS/nixpkgs/pull/188060

4.4.42 luna-pnr

• https://github.com/ngi-nix/LunaPnR-flake/pull/1

4.4.43 Jitsi Meet

- Update of components to latest stable versions, fix of one update script: https://github.com/NixOS/nixpkgs/pull/185033
- Vosk speech recognition service: https://github.com/NixOS/nixpkgs/pull/186917/
- Vosk compatibility fixes for Jigasi: https://github.com/NixOS/nixpkgs/pull/137003#pullrequestreview-1082232106
- Deployment Story:
 - https://github.com/NixOS/nixos-summer/pull/36
- Fix version order bug in all update scripts: https://github.com/NixOS/nixpkgs/pull/197207
- Second update of components to latest stable versions: https://github.com/NixOS/nixpkgs/pull/198303

4.4.44 Nyxt

https://github.com/NixOS/nixpkgs/pull/185975

4.4.45 mobile-nixos

- Development Story: https://collinarnett.me/Mobile%20NixOS%20Development.html
- In progress calamares extension: https://github.com/ngi-nix/mobile-nixos-calamares-extension

4.4.46 vframe

• https://github.com/ngi-nix/vframe/tree/nix-integration

4.4.47 etherpad

 In progress nixos module: https://github.com/ngi-nix/etherpad-nix

4.4.48 Milagro-crypto-js

• https://github.com/ngi-nix/ngi/issues/196

4.4.49 Milagro-dta

• https://github.com/ngi-nix/ngi/issues/196

4.4.50 LibrEDA (in progress)

• https://github.com/ngi-nix/libreda

4.4.51 PeerTube

- https://github.com/NixOS/nixpkgs/pull/191494
- https://github.com/NixOS/nixpkgs/pull/191497

4.4.52 Misskey

• https://github.com/ngi-nix/misskey-d2n

4.4.53 Supermin

• https://github.com/ngi-nix/supermin

4.5 Ecosystem

4.5.1 PRoot

• Fix unsupported syscall breaking nix installer on current kernels: https://github.com/proot-me/proot/pull/338
